1.1 (i) THE THREE QUESTIONS (Continuous passage)

Learning Competencies:

- Communication
- Creative Thinking
- Reflection
- Managing / Retrieving information.
- Interpretation
- Inference

Read the following passage and answer the questions that follow:

As the answers to his questions were so different, the king was not satisfied and gave no reward. Instead, he decided to seek the advice of a certain hermit, who was widely known for his wisdom. The hermit lived in a wood which he never left. He saw no one but simple people and so the king put on ordinary clothes. Before he reached the hermit's hut the king left his horse with his bodyguard and went on alone.

As the king came near the hermit's hut, he saw the hermit digging the ground in front of his hut. He greeted the king and continued digging. The hermit was old and weak and as he worked, he breathed heavily.

The king went up to the hermit and said, "I have come to you, wise hermit, to ask you to answer three questions: How can I learn to do the right thing at the right time? Who are the people I need most? And what affairs are the most important?"

The hermit listened to the king, but did not speak. He went on digging. "You are tired," said the king. "Let me take the spade and work in your place." "Thanks," said the hermit, giving the king his spade. Then he sat down on the ground.

APKALLU

The MYTHOLOGICAL SEVEN SAGES OF MESOPOTAMIA

The Apkallu served as priests of Enki and as advisors or sages to the earliest kings of Sumer before the flood.

APKALLU WEARING A FISH CLOAK

The **APKALLU** (Akkadian), or Abgal (Sumerian), are seven sages, demigods who are said to have been created by the god Enki (god of deity of crafts, mischief, intelligence and creation) to establish culture and give civilization to mankind.

The Apkallu emerged from the oceans (Abzu, the "sweet waters") to live with the early human beings and teach them the arts and other aspects of civilization such as writing, law, temple and city building and agriculture.

They are credited with giving mankind the **ME** (moral code), the crafts, and the arts, and therefore referred to at times as the 'Craftsmen'.

The Apkallu are first referred to in the Erra Epic by the god **MARDUK**, who asks "Where are the Seven Sages of the Apsu, the pure puradu fish, who just as their lord Enki, have been endowed with sublime wisdom?"

The "SEVEN SAGES"

Portion of the Epic of Gilgamesh...

In the Epic of Gilgamesh, the Apkallu are mentioned as the builders of the walls of Uruk.

After the Flood, the god Marduk banished them back to Abzu.

1. **UANNA**: "who finished the plans for heaven and earth."
2. **UANNEDUGGA**: "who was endowed with comprehensive intelligence."
3. **EMMEDUGGA**: "who was allotted a good fate."
4. **ENMEGALAMMA**: "who was born in a house."
5. **ENMEBULUGGA**: "who grew up on pasture land."
6. **AN-ENLILDA**: "the conjurer of the city of Eridu."
7. **UTUABZU**: "who ascended to heaven."

2.1 A Gift Of Chappals (Continuous passage)

26/HONEYCOMB

unappreciative:
disapproving

"Here!" said Ravi to the beggar, dropping the slippers in front of the old man. "Wear these and don't come back!" The beggar stared at the slippers, hurriedly flung his towel over his shoulder, pushed his feet into them and left, muttering a blessing to the children. In a minute he had vanished around the corner of the street.

The music-master came out of the house and took an unappreciative look at the three of them sitting quietly under the tree, playing marbles. Then he searched for his chappals in the verandah, where he had put them.

"Lalli!" he called, after a few moments. She hurried up to him. "Have you seen my chappals, my dear? I remember having kept them here!"

Ravi, Mridu, and Meena silently watched Lalli and the music-master search every corner of the verandah. He scurried around, looking over the railing and crouching near the flower pots to look between them. "Brand new, they were! I went all the way to Mount Road to buy them!" he went on saying. "They cost a whole month's fees, do you know?"

Soon Lalli went in to tell her mother. Rukku Manni appeared, looking harassed, with Paati following her.

"Where could they be? It's really quite upsetting to think someone might have stolen them. So many vendors come to the door," worried Paati.

Rukku Manni caught sight of Ravi, Mridu, and Meena sitting under the tree. "Have you children..." she began, and then, seeing they were

Learning outcomes

- Reads the text with comprehension, locates details and sequence of events.
- Answers coherently in written or oral form.
- Able to read and write according to the given instructions.
- Slowly move to be independent readers and writers.
- Uses meaningful grammatically correct sentences to describe and narrate incidents.
- Able to connect the ideas that the learner has inferred, through reading and interaction and personal experiences.
- Independent creative writers.
- Can co-relate the text experience to real life situations.

Competencies

- Managing and retrieving information.
- Creative thinking
- Critical thinking
- Problem solving
- Communication and writing.

- 1.** When the music master came out of the house, he had an unappreciative look.

Why was it so?

- a. He was looking for all the children around.
- b. He wanted to call and speak to someone.

1. The diagram shows the increase in co₂ emission level from 1990 to 1998 that is 11% now show the calculation to demonstrate how the 11% is obtained.

(LO- mathematical abilities)

2. Make the graphical representation of the atmospheric carbon dioxide in a period
Over 10 years, an increase in co₂ from 1970 to 2020 from 300ppm to 410 ppm.

(LO-graphical presentation)

1970-300, 1980-325, 1990-335, 1995-350, 2020-410.

3. How you can help decrease your carbon footprint by decreasing your water and electricity bill?
 - a. Recycling
 - b. Driving more
 - c. Sharing more

(LO-experiential skills)

4. What human activity produces the most carbon dioxide?

(LO-real life skills)

2.2(i) The Rebel (Continuous passage)

Learning outcomes

- Reads and enjoys poems
- Infers meaning
- Compares, contrasts
- Thinks critically
- Relates ideas to life
- Vocabulary

(LO- Analytical skill)

2. How can a rebellious attitude of a child or person be fixed?
(LO-problem solving)

3. What is the age in which we see a child is very rebellious?
(LO- experiential)

4. What could be the possible cause of rebellion?
 - a) Looking for self identity
 - b) Independence
 - c) To control
 - d) Acceptance and attention issues.

(LO- critical thinking)

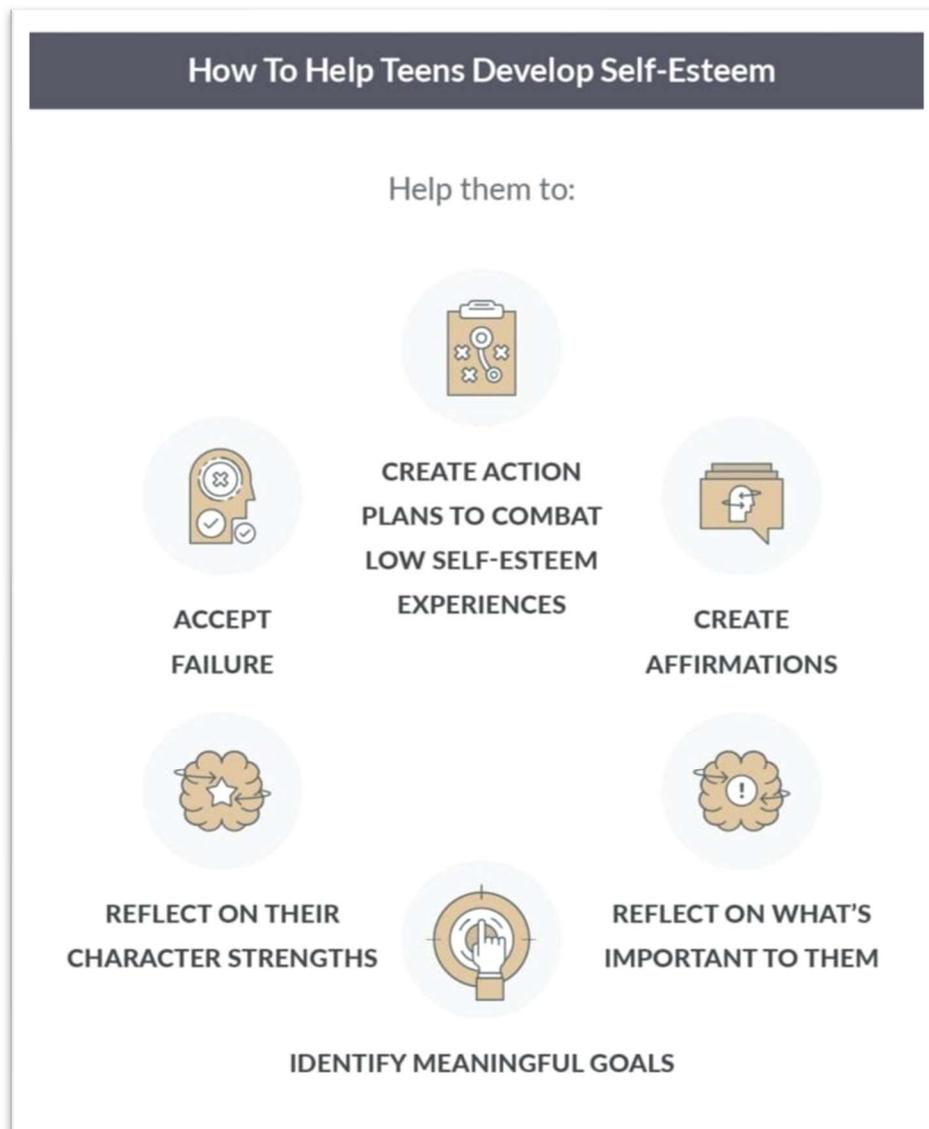

5. What is the antonym of rebel?

2.2 (ii) (Non-continuous passage)

Learning outcomes

- Expresses opinions
- Identifies details main idea and sequence of ideas and events while reading
- Reads, compare, contrasts, thinks critically and relates ideas to life.

Study the information given below and answer the questions:

1. How should an affirmation be formed?

- An affirmation needs to be in present tense and positive.
- An affirmation is a promise to others
- An affirmation is a group decision.
- An affirmation needs to be very personal.

(lo- analysing)

2. What makes children misbehave with others?

- a. To exercise power
- b. To be understood
- c. To be liked
- d. To gain attention

(lo- problem solving)

3. What are the superpowers and how can one use them for good?

(lo- critical thinking skills)

4. What is the secret of happiness?

(lo- real life skills)

3.1(ii) (Non-continuous passage)

Study the image given below and answer the questions that follow:

1. Read the following statements:

- Respiratory system of both fish and humans starts from the mouth.
- Both fish and human release the gasses through mouth.
- Humans breathe through nose whereas fish through gills.

Which of the following options is correct?

- Both a and b are correct
- Only a is correct
- All the three statements are correct
- All are incorrect

(LO- comprehends textual material)

2. Fill in the blank with the correct order of organs used by humans while breathing.

Nose –Windpipe -.....Lungs

(LO- Identify the details and sequence the ideas and events in textual material)

3. The gas released during the breathing process is _____.

(LO- comprehends textual material)

4. If in Kerala 3600 fish is consumed in a day, how many fish will be consumed in a month of August?

(LO- able to perform basic computations)

5. Mention any two characteristics which are common in both humans and fish in respiration process

(Lo- comprehends textual material)

Read the given text and answer the questions that follow:

There's a dusty old window around at the side
With three cracked panes of glass,
I often think there's someone staring at me
Each time that I pass,
I'll peep through that window one day.
My brother says there's a ghost in the shed
Who hides under the rotten floorboards,
And if I ever dare to set foot inside
He'll jump out and chop off my head,
But I'll take a peek one day.
I know that there isn't really a ghost,
My brother tells lies to keep the shed for his den;
There isn't anyone staring or making strange noises
And the spider has been gone from his web
since I don't know when,
I'll go into that shed one day soon,
But not just yet...

1. How does the poet's brother wants to keep the shed for himself?
 - a. By telling imaginative stories
 - b. By instilling fear of ghost in his mind
 - c. Both of the above
 - d. None of the above

(LO- answers question based on given text)

2. Which of the following feature of the shed shows that it has been neglected?
 - i. Broken glass panes
 - ii. Rusty hinges
 - iii. Damaged tiling
 - iv. Clean window panes

Choose the correct option

- a. Both i and ii are correct
- b. i, ii and iii are correct
- c. All options are correct
- d. All are incorrect

(LO- answers question based on given text)

3. What does, "but not yet "suggest about the poet?

Read the given text and answer the questions that follow:

That night the spirit of the dog appeared to him in a dream and said, "Cut down the pine tree over my grave, and make from it a mortar for your rice pastry and a mill for your bean sauce." So, the old man chopped down the tree and cut out of the middle of the trunk a section about two feet long. With great labour, partly by fire, partly by the chisel, he scraped out a hollow place as big as a small bowl. He then made a long-handled hammer of wood, such as is used for pounding rice. When New Years' time drew near, he wished to make some rice pastry. When the rice was all boiled, granny put it into the mortar, the old man lifted his hammer to pound the mass into dough, and the blows fell heavy and fast till the pastry was all ready for baking. Suddenly the whole mass turned into a heap of gold coins. When the old woman took the hand-mill, and filling it with beans began to grind, the gold dropped like rain.

Meanwhile the envious neighbour peeped in at the window when the boiled beans were being ground. "Goody me!" cried the old hag, as she saw each dripping of sauce turning into yellow gold, until in a few minutes the tub under the mill was full of a shining mass of gold.

Read the given text and answer the questions:

Panel 1:

I ordered several pairs. It was very long before they came —but they were better than ever. One simply could not wear them out. And soon after that I went abroad, and it was over a year before I returned.

Panel 2:

And the first shop I went to was my old friend's. I had left a man of sixty; I came back to one of seventy-five, pinched and worn, who genuinely, this time, did not at first know me.

Do you want any boots? I can make dem quickly; id is a zlack dime.

Please, please! I want boots all around —every kind.

I really wanted to help him, and ordered several pairs that day.

Panel 3:

I had given those boots up when one evening they came. One by one I tried them on. In shape and fit, in finish and quality of leather they were the best he'd ever made. I flew downstairs, wrote a cheque and posted it at once with my own hand.

Panel 4:

Is Mr Gessler in?

No, sir, but we can attend to anything with pleasure. We've taken the shop over.

Yes, yes, but Mr Gessler?

Oh! He's dead.

Panel 5:

Read the given passage carefully and answer the questions that follow:

I wrote in large block letters:

CATCHING A CROOK

Expert Detectives: Nishad and Maya Pandit By Appointment to the Whole World

Then I began writing.

About half an hour later, I turned towards Seven who was lying on his tummy, chin cupped in his palms, reading comics. "Want to hear what I've written?" I asked.

He looked up questioningly. "I've listed all the facts we know about Mr. Nath which might help us to trap him," I said. "Want to hear?"

Seven nodded.

"Fact Number1," I read, "his name is Mr. Nath. We must discover his first name." "Do you think that's his real name, Maya?" Nishad asked.

"Probably not," I said. "Most crooks have an alias." I added a big question mark after Nath.

"Fact Number 2," I read on, "the tenants at Shankar House say he's mad, strange and unfriendly. "Number 3, he doesn't talk to anyone and is manner less." "But he did talk to us, Maya, and Mamma says he's very polite," Nishad interrupted.

"Fact number 4, he doesn't receive any letters." Seven nodded. "Number 5, he's been living in Room 10 of Shankar House for more than a year," I continued.

"Number 6, he doesn't work and sits in his room all day. "Number 7, the kids in Shankar House and even some of the grown-ups are scared of him.

"Number 8, he has no visitors except for a spectacled, fair, fat man who visits him on Sundays for lunch. "Number 9, food and tea are taken to his room by Ramesh from the restaurant downstairs. He doesn't care what he eats, pays his bill immediately and tips well. That ends my list. Have I forgotten anything, Seven?"

Have you ever wished that you were older? Have you wished that you could grow up in a hurry?

The Invention of Vita-Wonk

Mr Willy Wonka begins by inventing Wonka-Vite, which makes people younger. But Wonka-Vite is too strong. So some people disappear, because their age becomes Minus! One person actually becomes minus eighty-seven, which means he's got to wait eighty-seven years before he can come back.

Mr Willy Wonka must invent a new thing...

I

Mr Wonka said, "So once again I rolled up my sleeves and set to work. Once again I squeezed my brain, searching for the new recipe... I had to create age... to make people old... old, older, oldest... 'Ha-ha!' I cried, for now the ideas were beginning to come. 'What is the oldest living thing in the world? Dad and the Cat and the Tree

Have you ever seen a cat climbing a tree? Sometimes a cat may climb too high and get stuck in the tree. The poor thing can't come down without help. How would you help it? Surely, not like Dad in the poem. Is Dad a good climber? What were his plans? Read the poem to find out.

This morning a cat got
Stuck in our tree.
Dad said, "Right, just
Leave it to me."

The tree was wobbly,
The tree was tall.
Mum said, "For goodness'
Sake don't fall!"

"Fall?" scoffed Dad,
"A climber like me?
Child's play, this is!
You wait and see."

He got out the ladder
From the garden shed.
It slipped. He landed
In the flower bed.

Read the following passage and answer the following questions: -

Early man didn't know what fire was, but he must have seen the damage it could cause. He must have watched lightning and volcanoes long before he began to use fire himself. Fire was powerful and dangerous, and he was frightened. Fire may have puzzled early man but we now know that fire is the result of a chemical reaction. When the oxygen in the air combines with carbon and hydrogen in a fuel, a chemical reaction takes place. Energy in the form of heat and light is released in this process. This is what we call fire.

Three things are needed to make fire — fuel, oxygen and heat. Wood, coal, cooking gas and petrol are some examples of fuel. Oxygen comes from the air. That is why, when you blow on smouldering paper, it often bursts into flame. The third thing needed to make fire is heat. Fuel and oxygen do not make fire by themselves, or else a newspaper or a stick lying in the open would catch fire on its own. To burn a piece of paper or wood, we heat it before it catches fire. We generally do it with a lighted match. Every fuel has a particular temperature at which it begins to burn. This temperature is called the 'flash point' or 'kindling temperature' of the fuel.

Read the following poem and answer the questions that follow: -

Meadows have surprises,
 You can find them if you look;
 Walk softly through the velvet grass,
 And listen by the brook.
 You may see a butterfly
 Rest upon a buttercup
 And unfold its drinking straws
 sip the nectar up.
 You may scare a rabbit
 Who is sitting very still;
 Though at first you may not see him,
 When he hops you will.
 A dandelion whose fuzzy head
 Was golden days ago
 Has turned to airy parachutes
 That flutter when you blow.

Read the given passage carefully and answer the questions that follow:

A man I knew proposed one evening we should go for a long bicycle ride together on the following day, and I agreed. I got up early, for me; I made an effort, and was pleased with myself. He came half an hour late; I was waiting for him in the garden. It was a lovely day. He said, "That's a good-looking machine of yours. How does it run?"

"Oh, like most of them!" I answered; "easily enough in the morning; goes a little stiffly after lunch."

He caught hold of it by the front wheel and the fork, and shook it violently.

I said, "Don't do that; you'll hurt it."

I did not see why he should shake it; it had not done anything to him. Besides, if it wanted shaking, I was the proper person to shake it. I felt much as I should had he started whacking my dog.

He said, "This front wheel wobbles." I said, "It doesn't if you don't wobble it." It didn't wobble, as a matter of fact—nothing worth calling a wobble.

1. The bicycle "goes easily enough in the morning and a little stiffly after lunch." The remark is

- (i) Humorous.
- (ii) Inaccurate.
- (iii) Sarcastic.
- (iv) Enjoyable.
- (v) Meaningless**

The world's first cricket club was formed in Hambledon in the 1760s,

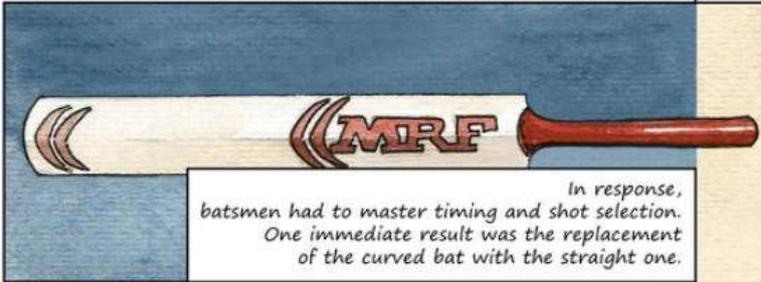

and the Marylebone Cricket Club (MCC) was founded in 1787.

During the 1760s and 1770s it became common to pitch the ball through the air rather than roll it under-arm, along the ground.

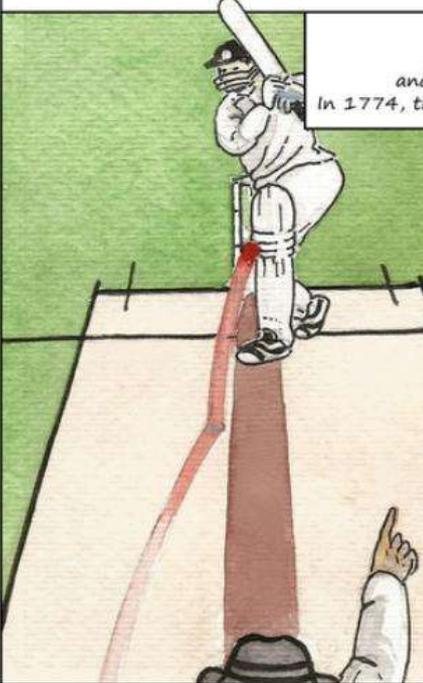

This change gave bowlers the options of length, deception through the air, plus increased pace. It also opened new possibilities for spin and swing.

In response, batsmen had to master timing and shot selection. One immediate result was the replacement of the curved bat with the straight one.

The weight of the ball was limited to between 5.5 and 5.75 ounces, and the width of the bat to four inches. In 1774, the first leg-before law was published.

Also, around this time, the third stump became common.

By 1780, three days had become the length of a major match, and this year also saw the creation of the first six-seam cricket ball.

Read the given information in the above picture and answer the questions given below.

1. The Parsees were the first Indian community to take to cricket. Why?

- (a) The British forced the Parsees to play cricket.
- (b) The Parsees knew about the game very well and decided to form their own cricket groups.
- (c) The Parsees were interested in trying new sports
- (d) The Parsees were the first to take to cricket because of their close contact with the British.

MINDSETS

FIXED MINDSET
The belief that skills, intellect, and talents are set and unchangeable.

GROWTH MINDSET
The belief that skills, intellect, and talents can be developed through practice and perseverance.

I'll stick to what I know. Either I'm good at it or not.	DESIRES	I want to learn new things. I am eager to take risks.
It's fine the way it is. There is nothing to change.	SKILLS	Is this really my best work? What else can I improve?
This is a waste of time; there's a lot to figure out.	EFFORT	I know this will help me even though it is difficult.
It's easier to give up. I'm really not smart.	SETBACKS	I'll use another strategy; my mistakes help me learn.
This work is boring. No one likes to do it.	FEEDBACK	I recognize my weakness, and I know what to fix.
It's easy for him or her. They were born smart.	TALENTED PEERS	I wonder how they did it. Let me try to figure it out.

Read the text of the poster given above and answer the questions that follow:

1. Why do you think the green is used for growth mindset and red is used for fixed mind set?

- (a) Because it makes a perfect colour match
- (b) Because both of the colours are in traffic lights
- (c) Green is a sign of prosperity whereas red signals to stop
- (d) None of these.

L.O: Thinks critically, compares and contrasts ideas

2. Timmy did not know how to cook food but he accepted it as a challenge.

What type of mindset does he possess?

- (a) Fixed Mindset
- (b) Growth Mindset
- (c) None of these
- (d) Both of these

L.O: thinks critically and relates to life

3. Which of the following does not match with the meaning of 'Effort'?

- (a) a series of actions tending towards a particular end
- (b) Long and tiring mental and physical work
- (c) Earnest activity intended to accomplish something
- (d) Leaving the task unfinished thinking I'm not good enough to do it.

L.O: infers the meaning of unfamiliar words by reading in the context

4. A spider falls many times before it makes its web successfully? Reflect on its mindset.
